*1: Average value of the final inspection in room temperature with Sumitomo identical fiber. Measured by cut-back method relevant to ITU-T and IEC standards.
*2: Splice & Heat cycles may vary depending on the battery status and the operating environment.
*3: Achieved in lab condition. Electrode life may vary depending on the operating environment.

Environmental Durability*

	Test details	
Shock resistance	Drop from 76cm on 5 faces (excluding top face)	
Water resistance	Equivalent to IK07 on LCD monitor (Protected against 2J impact, it is equivalent to a 500g force from 40cm)	
Water resistance	Equivalent to IPx2 (Operates normally after being exposed to water dripping at 3mm/min. for at least 2.5 min on each of 4 surfaces tilted at 15°)	
Dust resistance	Equivalent to IP5x (Operates normally after 8 hours in a test chamber with circulating dust particles smaller than 75μ m)	

*Splicer operation after shock, water or dust tests, was confirmed under

battery power, by Sumitomo. Does not guarantee the product will not be damaged by these conditions.
